

Tyrolean Innovation Day 2009

Global developments, regional prospects and exciting innovations are the topics of this annual innovation event in the Tyrolean capital Innsbruck.

Tyrol is a high-tech driven region where world class research meets highly innovative companies. The Tiroler Zukunftsstiftung arranges the Tyrolean Innovation Day every year as a partner and funder of many regional projects. Innovation Day is a platform where participants can enhance their business network and meet potential new partners.

At Innovation Day you can discover the latest Tyrolean innovations and exciting research results. At the same time, you can socialize with well-known Tyrolean researchers, political representatives and entrepreneurs from the five Tyrolean clusters: Renewable Energies, IT, Life Sciences, Mechatronics and Wellness. Tyrolean Innovation Day is a perfect opportunity for information exchange and networking beyond regional and national borders.

Agenda

Under the slogan "Tyrol Tomorrow", this year's Tyrolean Innovation Day takes a look at future aspects of the Tyrolean economy and research location. With a wide variety of different lectures and exciting project presentations you can learn the latest innovative developments.
